

24 January 2025

Dear Resident

Invitation to participate in Traffic Calming Proposal Consultation

As part of our ongoing efforts to improve traffic conditions and create a safer environment for residents, we are proposing the introduction of traffic calming measures on Beech Street, Evans Head.

Traffic calming measures are designed to reduce speeding vehicles, encourage safer driving behaviour and make our streets more pedestrian friendly. Our goal is to create a safer, more enjoyable space for everyone in the community, especially children, cyclists and pedestrians.

To ensure that the proposed changes reflect the needs and concerns of those who are impacted, Council are seeking your input. We highly value your opinions and encourage you to participate in the community consultation process. This will give you an opportunity to review the proposed measures, ask questions and provide feedback.

Council has engaged GeoLink Consulting Pty Ltd to investigate the design of appropriate traffic calming infrastructure for Beech Street, Evans Head. A combination of options can be found in the Concept Design Options Report along with Plans, available to view on Council's Website <https://richmondvalley.nsw.gov.au/council/on-exhibition/current-exhibition-items/> or in person at our Casino or Evans Head Office.

The consultation period will commence on **28 January 2025** and conclude on **25 February 2025**. Any suggestions or feedback should be submitted in writing to council@richmondvalley.nsw.gov.au

Your feedback will play a crucial role in shaping the final plan. We want to ensure that these measures address the concerns of our community, while improving the overall safety and quality of life for all residents.

Yours sincerely

Ben Zeller
Director Projects & Business Development
